Experience

Bimasakti Multi Sinergi - Fulltime - Indonesia
DevOps Engineer | Mar 2023 - Present

As a DevOps Engineer at Bimasakti over the past 1.5 years, I collaborated with three teams managing diverse products built on complex microservices. My key accomplishments include:

- Migrating services from Docker on GCE to Kubernetes on GKE, enabling scalable and resilient infrastructure.
- Building automated deployment pipelines for GKE using GitLab CI/CD.
- Implementing comprehensive monitoring for GKE workloads, node resources, and PostgreSQL with Grafana, Prometheus, Telegraf, and InfluxDB.
- Integrating Cloudflare WAF as a protective front layer to enhance security.
- Managing the ELK stack to streamline service log management.
- Daily monitoring service availability
- Also Optimizing cloud costs by fine-tuning resource requests and limits for service pods.

This role strengthened my expertise in cloud infrastructure, automation, and cost-effective DevOps practices.
